Submodule 35.12: Local Repo ko GitHub par Push Karna (Hinglish)

1. Complete Workflow Diagram

Apne computer ke local project ko GitHub par naye repository ke sath connect karke push karne ka step-by-step tareeqa:

2. Step-by-Step Commands

Step 1: Local Setup

```
mkdir project_ml
cd project_ml
git init
```

Step 2: Files banakar Commit karein

```
touch index.html README.md
git add .
git commit -m "Initial commit"
```

Step 3: GitHub par Empty Repo Banayein

- GitHub par **New repository** par jayein.
- Naam likhein aur **Add README** par tick **MAT** lagayein (taaki repo bilkul empty rahe).
- **Create repository** par click karein.

Step 4: Remote URL Link Karein

GitHub par diye gaye 3 commands run karein:

```
# 1. Remote link connect karo
git remote add origin https://github.com/aapka-username/project_ml.git

# 2. Branch ka naam 'main' confirm karo
git branch -M main

# 3. Pura code push karo
git push -u origin main
```

Ab browser refresh karke dekhein, aapka pura code GitHub par live ho chuka hoga!
