Submodule 35.15: Git Branch Commands (Hinglish)

1. Branch Commands ka Overview

Git branches ko create karne, dekhne, switch karne, aur delete karne ke liye dedicated commands hoti hain.

---

2. Mukhya Commands ki List

1. Saari Branches Dekhna:

```
git branch
```

- Project ki saari local branches list karta hai.
- Star (`*`) aur green color batata hai ki aap abhi kis branch par khade ho.

2. Nayi Branch Banana:

```
git branch feature-login
```

(Nayi branch ban jati hai par aap abhi usi purani branch par rehte ho).

3. Branch Change (Switch) Karna:

```
# Puraani command
git checkout feature-login

# Nayi modern command
git switch feature-login
```

- Aapka working directory target branch ke code par update ho jata hai aur `HEAD` pointer wahan shift ho jata hai.

4. Nayi Branch Banakar Turant Switch Karna (Short Command):

```
git checkout -b feature-login
# Ya:
```

```
git switch -c feature-login
```

Yeh sabse popular command hai jo 1 second mein branch banakar usme enter bhi kar deti hai.

5. Branch Rename Karna:

```
git branch -M main
```

6. Branch Delete Karna:

```
# Safe deletion (agar code merge ho chuka hai)
git branch -d feature-login

# Force deletion (bina merge kiye forcefully delete)
git branch -D feature-login
```

> [!CAUTION] Jis branch par aap khade ho, use delete nahi kar sakte. Pehle `git checkout main` karein, phir doosri branch delete karein.
